ABOUT US

Rák and Rák Gear Manufacturing Corp. has been present in the parts manufacturing industry since 1920. Our Company's scope of activities is extremely wide because we manufacture custom parts and cog-wheels/gears for, gearpumps, agricultural machinery, railroad vehicles, various drives, and for food industrial, chemical industrial, mining industrial and energy sector machinery unique and in mass production. We undertake the manufacturing and repair of gears and gear-boxes (drives) for which our customers don't have technical documentation any more.

The machine gear design and production not just a work for Us, but tradition.
